OBJECTIVE STATEMENT

I am a Full-Stack Developer that graduated from the Coding Bootcamp from the University of Central Florida. With a passion for continuous growth, I thrive in dynamic and fast-paced environments. Additionally, I am a strong collaborator that excels in diverse teams.

PERSONAL PROJECTS

My Wedding Website (<https://cindygiorgo.com>)

- Utilized Python and the Flask framework to develop a website for my upcoming wedding
- Developed RSVP functionality where guests submit their response, allergies, and a note to the couple
- Created feature that sends a custom text to my cellphone with guests' response when they RSVP
- Configured a virtual private server (VPS) as a web server and mail server using Nginx/Postfix
- Configured domain name system (DNS) for custom domain name, mail server
- Set up HTTPS with Let's Encrypt and Certbot for automatic certificate renewals

Project Manager

- Used MERN Stack to create a fully functioning project management application
- Used MongoDB to save user data
- Used JSON web tokens to create a more secure experience

Kinesiology Blog

- Incorporated Django framework for the application
- Created user registration and log in functionality and maintained SQLite database through CLI
- Created class-based views in order to create, update, and delete posts
